Euclid.

BOOK I.

PROPOSITION I. PROBLEM.

ON *a given finite ſtraight line* (——) *to deſcribe an equilateral triangle.*

Deſcribe  and  (poſtulate 3.); draw —— and —— (poſt. 1.).

then will  be equilateral.

For —— = —— (def. 15.);

and —— = —— (def. 15.),

∴ —— = —— (axiom. 1.);

and therefore  is the equilateral triangle required.
